BETTING INFORMATION DISPLAY SYSTEM BY TERMINAL FOR AT-HOME
BETTING SYSTEM
FUJITSU LTD

Inventor(s): ; KUWABARA SHINICHI

Application No. 63150835, Filed 19880617, Published 19891221

Abstract: PURPOSE: To improve serviceability for an at-home bettor by displaying a picture on which betting is performed by processing a teletext signal and performing odds selection, etc., a picture for direct voting, and an enquiry picture for a betting result, selectively.

CONSTITUTION: The title system is provided with a means to display an edited and processed result by converting a digital signal from a teletext processing part 1 and inputting it to a computer system in a betting processing part 2, and a means to transmit betting information from a keyboard in the betting processing part to a telephone betting system. And the picture for the direct betting, the picture on which the betting can be performed by odds selection, etc., and the picture possible to inquire the betting result, etc., are displayed selectively, and also, individual information on approval and disapproval, etc., inputted by a customer based on well-known information can be displayed on an odds picture in which a pair number etc., is set as a base.
